ORGANIZE TO ACT!
A Talk by Ryan
Bodyani
11:30AM TO 12 NOON

The **Bhopal Gas Tragedy** is the worst ever industrial accident that took place 20 years back claiming 50,000 lives, and thousands more still suffering. A photo exhibition by **Raghu Rai & Maude Dorr** documents the horror of the disaster & the perseverance of those who survived to demand corporate accountability & their basic human right to an environment free of chemical poisons.

Rajan Sharma, the primary attorney representing the Bhopal survivors in a federal class action litigation against Union Carbide, talks on the search for justice for the victims in the US legal system.

An expert panel consisting of **Rajan Sharma**, **Prof. Arvind Verma**, Criminal Justice, IUB, **Prof. Diane Henshel**, Public & Environmental Affairs, IUB, & **Ryan Bodanyi**, Student Coordinator of ICJB will discuss Bhopal and what we can learn from it.

Student groups from IU, including, **AID**, **Amnesty**, **No Sweat**, and **STAND** showcase their activities towards promoting sustainable development through tables, interactive sessions, and talks.

Ryan Bodanyi, who spearheads the **StudentsForBhopal.org** group of over 70 schools worldwide, will talk about the importance of students participating in activism, the challenges they might encounter, and some innovative ways to make your voice heard.
