INDIANA UNIVERSITY

Bloomington

presents

## *Biological Security and International Security*

# **CHRISTOPHER CHYBA**

Woodrow Wilson School of Public & International Affairs

**Christopher Chyba** is professor of astrophysical sciences and international affairs at Princeton University, where he also directs the Program on Science and Global Security at the Woodrow Wilson School of Public and International Affairs. His security-related research emphasizes nuclear and biological weapons policy, proliferation, and terrorism. His scientific research focuses on solar system exploration and the search for life elsewhere. He served on the White House staff from 1993 to 1995, entering as a White House Fellow on the National Security Council staff and then serving in the National Security Division of the Office of Science and Technology Policy (OSTP). After leaving the White House, he drafted the President's decision directive on responding to emerging infectious diseases, and authored a report for OSTP in 1998 on preparing for biological terrorism. Dr. Chyba currently serves on the National Academy of Sciences' Committee for International Security and Arms Control. With Ambassador George Bunn, he is editor of the newly published *U.S. Nuclear Weapons Policy: Confronting Today's Threats* (Brookings Institution Press).

Dr. Chyba's lecture is the second in the *WMD Proliferation and US National Security: A Lecture Series* sponsored by CAGS in the Fall 2008 semester
