Digital Data Projector/PC Laptop Setup

Step 1: Unpack the Digital Data Projector (DDP), DDP power cord, and VGA cable from the DDP bag.

Step 2: Unpack the PC Laptop, power cord, and Ethernet cable from the PC Laptop bag.

Step 3: Plug in DDP power cord into the back of the DDP.
Step 4: Plug in one end of the VGA cable into Input 1 on the back of the DDP.

Step 5: Plug in PC power cord into back of the PC Laptop.
Step 6: Plug other end of VGA cable into back of PC Laptop.

Step 7: Plug Ethernet cable into the back of the PC Laptop.
When setup is complete, it should look like the following.

Step 8: Plug yellow end of Ethernet cable labeled “IU Wall” into bottom (normally yellow) Ethernet jack.
Step 9: Turn on DDP.
Step 10: Turn on PC Laptop.
Step 11: Log in using your IU username and password.
