VCR Player/TV Hookup

Step 1: Unpack the VCR player from the bag.

Step 2: Locate the A/V inputs on the TV. They could be located on the front or the back of the TV, but are labeled “audio in” and “video in” (most TVs have color inputs: yellow for video, white for audio-left and red for audio-right).
Step 3: Plug in the yellow end of the A/V cable into the video input, the white end of the A/V cable into the left/mono-audio input, and the red end of the A/V cable into the right-audio input.

Step 4: Turn on VCR player and TV.
Step 5: Make sure TV is set to channel 3.
Step 6: Press play on VCR player.
