

Your name:

Paper title:

What was the research question posed in the paper?

What stimuli were used? What was the procedure and design of the experiment?

What were the results?

Do you find the results/method significant, unexpected, and exciting? And why?

What is the take-home message you've learned from this paper? (1-2 sentences)

Are there any open questions on the current paper and any ideas on designing follow-up studies? Briefly describe the logic.
