

H490 digital portfolio design

Digital Portfolio Design is a 3 credit hour course that exposes students to a variety of digital presentation techniques and approaches. Through its studio-based learning environment and teaching methodologies, students not only gain an understanding of how and why digital presentation techniques are used in design, but also receive ample opportunity to build and nurture their skills by creating a portfolio of interactive web projects.

Open to students from any design discipline, this course features one-on-one and small group interaction with the instructor and fellow students. This approach fosters an environment of creativity and constructive analysis that enhance digital skills development.
