

Dr. Schoch-Spana, a medical anthropologist, is Senior Associate with the Center for Biosecurity of the University of Pittsburgh Medical Center (UPMC), Assistant Professor at the University of Pittsburgh's School of Medicine Division of Infectious Diseases, and an investigator with the National Center for the Study of Terrorism and Responses to Terrorism. Since 1998, Dr. Schoch-Spana has led research, education, and advocacy efforts to encourage greater consideration by authorities of the general public's capacity to confront bioattacks and large-scale epidemics constructively. National advisory roles include serving on the Steering Committee of the Disaster Roundtable of the National Research Council (NRC) and with the NRC Committees on "Educational Paradigms for Homeland Security" and "Standards and Policies for Decontaminating Public Facilities Affected by Exposure to Harmful Biological Agents: How Clean is Safe?" Schoch-Spana recently chaired the *Working Group on Citizen Engagement in Health Emergency Planning*, and was the principal organizer for the 2006 U.S.-Canada summit on *Disease, Disaster & Democracy – The Public's Stake in Health Emergency Planning*. In 2003, she chaired the *Working Group on "Governance Dilemmas" in Bioterrorism Response* that issued consensus recommendations to mayors, governors, and top health officials nationwide in 2004. Schoch-Spana helped establish the Biosecurity Center of UPMC in 2003 after serving with the Johns Hopkins University Center for Civilian Biodefense as a founding member (1998). She received her A.B. from Bryn Mawr College in 1986 and her PhD in cultural anthropology from the Johns Hopkins University in 1998.
