Riley Hospital announces \$500 million expansion

A major announcement by Riley Hospital for Children, a Clarian Health Partner, in today's *Indianapolis Star* is the culmination of the work of the Riley Strategic Planning Process. The RSP has had over 100 individuals from various constituencies directly involved in strategic discussions.

Riley is Indiana's children's hospital and these progressive steps will enhance the ability to meet the needs of Indiana's children.

The story is the first part of a formal announcement of a 10-year, \$500 million, five-point plan to invest in Indiana's children. The plan's elements include:

1. A reorganization of Clarian's pediatric services
 - Branding of Riley across Clarian pediatrics
 - A plan that will make Riley the second largest children's hospital in the country, with more than 400 hospital beds
 - A commitment to general pediatrics based on a collaboration between community, Methodist-based and Riley-based general pediatricians
2. A comprehensive and strategic statewide strategy
 - Riley will offer expanded pediatric sub-specialty services to every corner of Indiana based on local needs and local partnerships
 - Expansion of Riley telemedicine partnerships throughout the state
3. Announcement of Phase V
 - 650,00 square foot, 10-story addition to Riley hospital that will provide the latest in technology and family-centered care
4. Aggressive recruitment of world-class clinicians and researchers

5. Major contributions to the life sciences sector through greater collaboration with Biocrossroads and related industry partners to enhance Indiana's economy

A news conference announcing the plan through other media outlets will be at 2 p.m. today in the Riley Hospital atrium. Medical staff and other personnel are invited to support the ambitious initiative on behalf Indiana's children.

IU-Bloomington offers new life sciences certificate program

A new Indiana University life sciences certificate program is being offered on the Bloomington campus to help students and area professionals improve their management skills.

Effective management is important for local life sciences employers, research institutions and clinics. The certificate program covers such topics as project management, regulatory affairs, organizational development, and teamwork and communications.

The first course, "Introduction to the Life Sciences Industry," will be offered Monday and Wednesday evenings Sept. 19-28 for \$99. The session will be taught by Steve Bryant, director of the Bloomington Life Sciences Partnership.

Applications for the complete certificate program will be accepted after the introductory class is completed. The remaining four classes will be taught in the spring semester for those admitted to the program.

For more information or to enroll, call 812-855-7801, or visit <http://www.continue.indiana.edu> and click on "Lifelong Learning."

Biomedical Entrepreneur Network meeting Sept. 13

"Do I have a product or company?" will be the topic of the next meeting of the Indiana Biomedical Entrepreneur Network on Tuesday, Sept. 13. Speakers will be Chad Barden, president and CEO of QuadraSpec Inc., and Teri Willey, managing partner of Arch Development Partners.

Registration will begin at 5 p.m. and the program will start at 5:30 p.m. at the University Place Hotel and Conference Center on the IUPUI campus.

The program is free, but space is limited so register early at <http://www.indianabionetwork.org>. The registration deadline is **Friday, Sept. 9**.

The Indiana Biomedical Entrepreneur Network promotes information sharing and networking for biomedical entrepreneurs.

Library site assists researchers with NIH request

Since May 2, the National Institutes of Health has requested that NIH-funded investigators submit an electronic version of their final revised manuscripts to the National Library of Medicine's PubMed Central repository upon acceptance for publication. To help school investigators understand the process, the Ruth Lilly Medical Library has created an informative web page, which is at <http://www.medlib.iupui.edu/nihopenaccess/nihopenaccess.html>.

This policy applies to manuscripts resulting from currently funded NIH research projects or previously supported NIH research projects *if manuscripts are accepted for publication on or after May 2, 2005*. This includes all research grant and career development award mechanisms, cooperative agreements, contracts, institutional and individual Ruth L. Kirschstein National Research Service Awards, as well as NIH intramural research studies.

The policy does not apply to book chapters, letters to the editor, reviews, editorials and conference proceedings.

NIH encourages investigators to authorize public release of submitted articles immediately after the journal publication date. However, the release date depends on the journal's copyright policy. In the NLM submission process, the principal investigator authorizes the date (up to one year) when the manuscript becomes publicly accessible on PubMedCentral.

My View on relationship-centered care

This past week, IUSM hosted "Enhancing the Professional Culture of Schools of Medicine," the nation's first conference focused on assessing and improving the organizational environment and culture of academic medical centers. The goal is to understand how to produce caring, compassionate physicians. Teams from seven medical schools across the U.S. and one from Canada fanned out across the IUSM campus to observe and discuss the influences of the "hidden" or informal curriculum on the formation of students to be physicians.

Thomas Inui, MD, president and CEO of Regenstrief Institute Inc. and associate dean for Health Care Research at IUSM, shared with *Indianapolis Star* readers in a *My View* column, how relationship-centered care can impact medical care and teaching. His letter to the editor can be found at [online at the *Indy Star*](#).

[BACK TO TOP](#)

Scope to be published on Fridays, copy deadline changes

Beginning Sept. 2, *Scope* will be emailed to faculty, staff, residents and students on Friday afternoons. By distributing the IUSM official newsletter at the end of the week, readers will have more time to absorb the content and plan for the week ahead.

With the change in publication, the deadline for *Scope* copy will be modified. Copy must be received by 8:30 a.m. Thursday for inclusion in the following day's issue.

There are three easy ways to submit story ideas or information to *Scope*:

- e-mail the information to mhardin@iupui.edu
- mail the information to Mary Hardin, Z-7, Ste. 306, IUPUI
- fax the information to (317) 278-8722

Contributions submitted by e-mail should be forwarded in 12 point, plain text format.

In the interest of accuracy, please avoid:

- acronyms
- abbreviations
- campus building codes (use full, proper name of building and include the room number)
- Dr. as a preface before names (designate MD or PhD)

If you have questions about a submission, call 274-7722.

If you would like to receive *Scope*, send your name, department and email address to mhardin@iupui.edu.

Annual Faculty Survey available online

The 2005 Faculty Annual Summary Report (ASR) now is available and should be completed by all regular faculty members who were active faculty during the past academic year (2004-2005). The deadline for submission is **Friday, Sept. 2**.

Primary changes this year include:

- On-line help has been added, including buttons with "More Information" and "See Examples" on each page. In addition, pop-up boxes with definitions are available throughout the forms.
- Graduate, medical school and undergraduate course teaching has been consolidated into one "Course" section. All information related to a course (such as lecture, course administration, mentoring, curriculum development) will be captured within this section.
- Clinical service roles, such as hospital committees, clinical administration, etc., have been added throughout the survey.
- Macintosh PCs will no longer be supported in this application; insufficient resources make it impossible to do so during this reporting period. Microsoft will end support for Internet Explorer on Macintosh PCs in December 2005.

Past information provided in the Faculty ASR has been beneficial to the development of the 3D faculty effort model, and this year's data is expected to provide aggregate information for legislators, central university management and hospitals to support the ongoing success of IUSM's educational endeavors.

The survey is available at <https://technology.iusm.iu.edu/asrv4/login.asp>. Contact Erik Cornet at finaff@iupui.edu with problems or questions about accessing the survey.

GI cancer seminar offered Sept. 16

"Gastrointestinal Oncology: The IU Multidisciplinary Approach" will be Friday, Sept. 16, at the Indiana History Center. Registration begins at 7:30 a.m., and the program will be from 8 a.m. to 5 p.m.

Open to medical oncologists, surgeons, gastroenterologists, interventional radiologists, radiation oncologists and nurses, the program, presented by IUSM faculty, will focus on state of the art multidisciplinary management of patients with esophageal, colorectal, pancreatic, and biliary tract malignancy.

For information or to register, contact the IUSM Division of Continuing Medical Education at 274-8353, or <http://cme.medicine.iu.edu>. The cost of the symposium is \$75. A dinner for participants will immediately follow at the Hyatt Regency Hotel. An additional \$25 fee will be assessed individuals who want to register for the dinner.

New and not-so-new research coordinators education program – Sept. 21-23

A program for the education and training of research coordinators has been developed for the IUSM Clinical Trials Program, the Outpatient Clinical Research Facility, and the IU School of Nursing. The program will introduce research coordinators new to Indiana University to critically important concepts, requirements and practical aspects of coordinating research studies across all types of clinical research. In addition to core curriculum, break out sessions are offered for both clinical and behavioral trials.

This program is mandated for all new IUSM coordinators with less than two years of experience coordinating studies on the IUPUI/Clarian campuses. While the program targets the new study coordinator, experienced coordinators and young investigators at IUSM, the schools of dentistry and nursing, Clarian Health Partners, and the VA and Wishard hospitals often attend to reinforce their skills.

The three-day session will be held September 21-23 in the Ruth Lilly Learning Center, conference rooms A and B, in

the Riley Outpatient Center. The cost is \$320 if registered by Sept. 7; after that date, the cost is \$370. Payment from grant accounts or other IU accounts is acceptable.

For additional information, see

http://nursing.iupui.edu/LifelongLearning/ProgramsAndConferences/RECEP/2005/RECP_0905.htm.

UITS offers computer training

UITS IT Training offers hands-on computer training workshops for students, faculty, and staff. Topics include Word, Flash, Fireworks, Photoshop, SQL, CSS, Perl, and many other programs. Workshops are generally three hours in length and most are free to students. Faculty and staff can attend some workshops at no charge or for a small fee.

For complete workshop descriptions, the schedule or to register, visit <http://ittraining.iu.edu/iupui/workshops/>.

Combined Seminar Series for September

The IU Cancer Center combined Seminar Series will be the first and third Wednesdays in September from 4 p.m. to 5 p.m. in the IU Cancer Research Institute auditorium. The lineup:

Sept. 7 – To be announced

Sept. 21 – Eun-Ok Im, associate professor of nursing, University of Texas at Austin, “To Eliminate Gender and Ethnic Disparities in Cancer Pain Management

[BACK TO TOP](#)

Lungs for Life run/walk – Sept. 24

The second annual Lungs for Life 5k race and one-mile fun walk will begin at 9 a.m. Saturday, Sept. 24.

Registration will take place at the Indiana Cancer Pavilion. The cost is \$18 and includes a T-shirt if registered before Sept. 19. After that date, the cost is \$20.

All proceeds go to the IU Cancer Center’s Thoracic Oncology Program to support the Lung Cancer Biomarker Discovery Program. With this program, the Thoracic Oncology Program is poised to take a leadership role in unlocking the clues to earlier detection and better treatments.

For more information or to register, visit www.lungsforlife5k.org, or email info@lungsforlife5k.org

International fellowship program seeks applicants

The Fogarty International Center/Elison Overseas Fellowship Program, a clinical research training experience for graduate level US students in the health professions, is now accepting applications.

The program offers a one-year clinical research training experience to qualified students. The program offers highly motivated individuals an opportunity to experience mentored research training at top-ranked NIH-funded research centers in a diverse group of countries, including Bangladesh, Botswana, Brazil, China, Haiti, India, Kenya, Mali, Peru, Russia, South Africa, Tanzania, Thailand, Uganda, and Zambia.

The program is sponsored by the NIH's Fogarty International Center in partnership with The Ellison Medical Foundation, the NIH National Center on Minority Health and Health Disparities, the NIH National Institute of Allergy and Infectious Diseases, and the NIH National Institute on Drug Abuse. The Association of American Medical Colleges and the Association of Schools of Public Health are managing the program, which is beginning its third year.

For additional information, contact Yolanda Thomas, AAMC Division of Biomedical and Health Sciences Research, at ythomas@aamc.org, or 202-828-0481 or visit www.aamc.org/students/medstudents/overseasfellowship/.

This week on *Sound Medicine*

Tune in at 4 p.m. Sunday, Aug. 28, to *Sound Medicine*, the weekly radio program co-produced by IUSM and WFYI Public Radio (90.1 FM) in Indianapolis. The program is hosted by Barb Lewis.

Eric Meslin, PhD, director of the IU Center for Bioethics, will revisit a topic that is making headlines again—stem cell research. Dr. Meslin will be joining *Sound Medicine* the first week of every month to discuss emerging medical ethics issues.

Special correspondent Marje Albohm has some helpful and healthful suggestions on how Hoosiers can get fit without getting hurt. Albohm is a certified athletic trainer in Indianapolis and a member of the board of directors of the National Athletic Trainers Association. She is a frequent contributor to *Sound Medicine*.

Co-host Kathy Miller, MD, will change roles this week and sit on the other side of the microphone for an interview on the benefits of support groups for women dealing with breast cancer. Dr. Miller is an oncologist specializing in breast cancer.

Correspondent Meghan Freeman pays a visit to Sniffles n' Such, a daycare specially operated for mildly ill children. The facility is connected with The Day Nursery and Clarian Health Partners Early Care and Education Center

Archived editions of *Sound Medicine*, as well as other helpful health information, can be found at soundmedicine.iu.edu/.

Submissions to Scope

Scope wants your news items.

The deadline for submission is 8:30 a.m. on Fridays. *Scope* is published electronically and sent to faculty, staff, students, and residents.

There are three easy ways to submit story ideas or information to *Scope*:

- e-mail the information to mhardin@iupui.edu
- mail the information to Mary Hardin, Z-7, Ste. 306, IUPUI
- fax your information to (317) 278-8722

Contributions submitted by e-mail should be forwarded in 12 point, plain text format.

In the interest of accuracy, please do NOT use:

- acronyms
- abbreviations
- campus building codes (use full, proper name of building and include the room number)
- Dr. as a preface before names (designate MD or PhD)

To keep the electronic version of *Scope* as streamlined as possible, only seminars and lectures of general or multidisciplinary interest will be included.
