## **Areas of Present Research:**

Ringquist, Evan J. “Promises and Performance in the U.S. Congress.” In this project I assess the extent to which the campaign statements of candidates affect how elected officials vote on legislation. This research is funded by the National Science Foundation. Co-authors on various elements of this project include Brendon Carroll (University of Leiden), Milena Neshkova (Florida International University), Nicole Quon (Indiana University), and Gerald Wright (Indiana University).

Hoornbeek, John, Evan Hansen, Robert Carlson, Evan Ringquist. “Implementing Total Maximum Daily Loads: Evaluating Results.” I am part of an interdisciplinary team consisting of two political scientists (Hoornbeek), an aquatic biologist (Carlson), and an environmental engineer (Hansen). This project is a continuation of our study of TMDL implementation. This extension focuses on evaluating the effectiveness of TMDLs at improving water quality. We are seeking support from the U.S. EPA.

Ringquist, Evan J. *Green Justice for All? The Influence of Race and Class in Environmental Protection*. This book manuscript evaluates the extent racial and class inequities with respect to several elements of environmental risk and the degree to which government policy contributes to these risks. Initial work on this project was funded by the National Science Foundation.

Ringquist, Evan J. and Tatiana Kostadinova. “International Cooperation in Environmental Protection.” Continuing the work reflected in our manuscript examining the Helsinki Protocol, we are currently beginning an investigation into the effectiveness of several other voluntary international environmental agreements. This research has been funded by the German Marshall Fund of the United States.
